Full Time Employees: 65,000

BUSINESS SUMMARY
Alcan, Inc. engages primarily in bauxite mining and alumina refining activities primarily in the United States, Europe, and Asia Pacific. It operates in four business groups: Bauxite and Alumina, Primary Metal, Engineered Products, and Packaging. Bauxite and Alumina group produces specialty aluminas, including products for a range of applications, such as fire retardant products, refractory bricks, zeolite, alum, solid surface products, absorbents, and ceramics. Primary Metal group provides aluminum products, such as sheet ingot, extrusion billet, rod, foundry ingot, and remelt ingot for conversion into fabricated products for end-use markets in consumer goods, transportation, building, and construction, as well as other industrial applications. It also offers smelter technology; equipment, such as cranes and potroom equipment for the aluminum industry; and engineering services. In addition, this group involves in the production of calcined coke, anodes, cathode blocks, and fluoride, which are used in the production, recycling, and refining of aluminum. Engineered Products group manufactures engineered or fabricated
